

Episode 16 - Leadership in Unknown Seas - Reading & Discussion List

Dear Audience,

As we prepare each show, internally we develop a reading list so our producers and hosts can develop the questions and arc of conversation for the hour. We find this research fascinating--- we are dealing with long term issues (the future of cities, the supply chain, news and democracy) that are being fundamentally affected by short term events. Many of the best minds on the planet have written thoughtfully on these topics, often over just the last few weeks!

We'd like to share these reading lists with our community so you can go deeper, see what we're reading, and share readings and topics with us for future shows. We also think that capturing this snapshot of global thinking about pandemic issues will serve as a time capsule (as does Quarantime!) for how the world reacted to the greatest torrent of fundamental change experienced in our lifetimes .
